Hi Alicia,

The boost should be downloaded and installed when you installed the external packages. Can you please check if it was downloaded to: your_path_to_fairsoft/basics/ The downloaded file should be boost_1_54.0.tar.bz2 .

If it is not there, you can try to download it from http://sourceforge.net/projects/boost/files/boost/1.54.0/ to this directory and run the installation macro again.

hope it helps, radek
