dear collaborators, after yesterday's Evo meeting this is the General agenda of the Pattern Recognition Day in Giessen, slightly modified after the received suggestions:

- 1- presentations on the progress by people actively working on the code;
- 2- discussion on how to avoid possible double-work on the V0 Pattern Recognition;
- 3- quality check of the different algorithms : we have already discussed that in the past; is it possible to have an official version of the task of association of the MC tracks to the found tracks and an official task that assess the quality and the speed of the algorithm ?
- 4- common tracking tools (Kalman etc.);
- 5- the Forward PR : where do we stand and where do we want to go?
- 6- the T0 task : do we want to have such a task and is there anyone available on working on that ?
- 7- the PR with MVD-GEM : where do we stand and where do we want to go?

Please when you are ready send me the title of your presentations so that I can set up also the timetable.

Cheers !

Gianluigi
