Hi,

I tried to install and compile the newest trunk 27083 following the recipe in the Wiki and starting from installing the external packages (jul14p3) and FairRoot. Both compiled successfully, but when compiling trunk itself I got the error

[49%] Building CXX object sds/CMakeFiles/Sds.dir/SdsDigi/PndSdsHybridHitProducer.cxx.o

/u/kgoetzen/pandaroot/trunk4/sds/SdsDigi/PndSdsHybridHitProducer.cxx:31:45: error:

make[1]: *** [sds/CMakeFiles/Sds.dir/all] Error 2
make: *** [all] Error 2

Does somebody know what's going wrong? Or is this simply a new bug?

Best,
Klaus
