Subject: Re: Error compiling PandaRoot (FairMultiLinkedData_Interface.h)
Posted by Tobias Stockmanns on Wed, 18 Feb 2015 09:02:19 GMT

Hi Klaus,

the problem arrises because you are using the new external packages with an old FairRoot version. In the new FairRoot the structure of the FairLinks has changed with the consequence that FairMultiLinkedData has to be replaced by FairMultiLinkedData_Interface. Unfortunately we cannot check which FairRoot version you are using therefore we check for the ROOT version. This fails in your case.

As a fast bypass just comment the lines with FairMultiLinkedData_Interface and the associated lines with "#if (ROOT_VERSION_CODE >= ROOT_VERSION(5,34,10))"

Cheers,

Tobias
