Hi Stefano,

In GSI Linux, FTF works in new version of PandaRoot.
Just now, I have installed and checked.

In Mac, to overcome errors

please, add in /FtfEvtGen/common.mk

in line

```
LDLIBS      += $(PANDALIBS) -L$(GEANT4_LIBRARY_DIR) -IG4clhep -IG4global  
-IG4geometry -IG4physicslists $(GLIBS)
```

```
-IG4processes
```

before \$(GLIBS)

Good luck

Aida
