I suppose you did not read the announcement:

[https://forum.gsi.de/index.php?t=tree&th=4509&goto=18085&#ms\\_g\\_18085](https://forum.gsi.de/index.php?t=tree&th=4509&goto=18085&#ms_g_18085)

nor the last SeeVogh minutes.

You cannot use the new trunk with apr13, you need to move to the new FairSoft mar15 and FairRoot v-15.03.
