Dear PandaRooters,

I have tried to install the external packages on my ubuntu 14.10 64 bit machine. When I am running ./configure command in fairsoft_mar15 directory it comes with the following error message.

```
*** Package gtest is OK ***
*** Downloading gsl sources ***
% Total  % Received % Xferd  Average Speed   Time    Time     Time  Current
          Dload  Upload   Total   Spent    Left   Speed
  0   0   0   0   0   0   0   0 --:--:-- --:--:-- --:--:--    0curl: (7) Failed to connect to
ftp.gnu.org port 21: Connection refused
*** Unpacking gsl-1.16.tar.gz .....
--E-- Cannot unpack package gsl
```

I have checked fairsoft_mar15/basics/ directory too as found some solution in previous one forum post. that could not solve my problem.

What should I do now?

Thanking you
Ajay
