Dear PandaRooters,

I have tried to install the external packages on my ubuntu 14.10 64 bit machine. When I am running ./configure command in fairsoft\_mar15 directory it comes with the following error message.

```
*** Package gtest is OK ***  
*** Downloading gsl sources ***  
% Total % Received % Xferd Average Speed Time Time Time Current  
 Dload Upload Total Spent Left Speed  
0 0 0 0 0 0 0 0 --:--:-- --:--:-- --:--:-- 0curl: (7) Failed to connect to  
ftp.gnu.org port 21: Connection refused  
*** Unpacking gsl-1.16.tar.gz .....  
--E-- Cannot unpack package gsl
```

I have checked fairsoft\_mar15/basics/ directory too as found some solution in previous one forum post. that could not solve my problem.

What should I do now?

Thanking you  
Ajay
