Subject: Re: Problem in installation of fairsoft on ubuntu 14.10 Posted by Ajay Kumar on Thu, 09 Apr 2015 15:17:03 GMT View Forum Message <> Reply to Message

## Hi Florian,

Actually, I was not able to download from ftp server so pythia6.tar.gz took from my old apr13 external packages directory and geant321+\_vmc.1.15a.tar.gz taken from CERN site. After that everything worked for me.

I have given proper path now and current error has been gone.

My PandaRoot also working fine now.

Thanks a lot.

Ajay
