Subject: [Fixed] PndMvdStripHitProducer undeclared function Posted by Stefan Pflueger on Mon, 01 Jun 2015 09:31:42 GMT View Forum Message <> Reply to Message

Hello,

I just got an undefined reference when linking to the libMvd, and the following member function is not implemented.

/\*\* Specify the branch & folder names for the I/O \*\*/ void SetBranchNames(TString inBranchname, TString outBranchname, TString folderName);

Since we mostly have macros that use the shared libraries, these errors usually do not appear unless you link to that library from somewhere else. Maybe we can turn on -WI,--no-undefined to avoid these kind of errors...

Cheers,

Stefan
