I see that the current version still does not have this fixed? Could someone please add the following lines to the PndMvdStripHitProducer.cxx, since I do not have any write permissions in that directory .

```
void PndMvdStripHitProducer::SetBranchNames(TString inBranchname, TString  
outBranchname, TString folderName) {  
    fInBranchName = inBranchname;  
    fOutBranchName = outBranchname;  
    fFolderName = folderName;  
    SetInBranchId();  
}
```
