I see that the current version still does not have this fixed? Could someone please add the following lines to the PndMvdStripHitProducer.cxx, since I do not have any write permissions in that directory .

```
void PndMvdStripHitProducer::SetBranchNames(TString inBranchname, TString
outBranchname, TString folderName) {
  fInBranchName = inBranchname;
  fOutBranchName = outBranchname;
  fFolderName = folderName;
  SetInBranchId();
}
```
