Dear all,
some time ago we created a wiki page with a list of the ongoing productions, on !PandaGrid and on the other Panda computing resources (Prometheus), with the aim to monitor the usage of the resources, to know if there are common data sets which could be shared (i.e. background at the same energies), and so on.

I would like to ask to all the people doing analysis, or who did analysis in the past which is still placed on disks, to fill the table or to send me the information so that I can fill the table. For a better management of the resources.

Here the link:

<https://panda-wiki.gsi.de/foswiki/bin/view/Computing/Productions>

Many thanks in advance.
