Subject: Re: Using Rho without MC info
Posted by Marcel Tiemens on Fri, 18 Sep 2015 11:10:11 GMT

Hi Ralf,

Thanks for your suggestion. I tried it out, and indeed there are no more error messages.
However, when using your patch in conjunction with the hack I proposed earlier (in
PndPidCorrelator::ConstructNeutralCandidate()), the macro doesn't finish properly... It finishes
without giving any errors, but also doesn't print the lines "Macro finished successfully." etc,
which the according to the macro clearly should happen. The resulting root file also doesn't
contain a tree. Running it without the hack I mentioned earlier causes the crash in my previous
message:

terminate called after throwing an instance of 'std::bad_alloc'
what(): std::bad_alloc
