Hi Yassid,

Minuit2 is enabled. You should find libMinuit2 in the root library directory beside the other libraries. FFT is not enabled since one needs an additional other library (fftw3). If you want to add the FFT you have to install fftw3 and add the following line

```
-DFFTW_DIR=<path to fftw installation>
```

to the file

```
tools/rootconfig.sh
```

Ciao

Florian
