Subject: [FIXED] mar15 - problem with intallation
Posted by Elisabetta Prencipe (2) on Tue, 27 Oct 2015 16:09:00 GMT

Hello Stefano,

 I am trying to install mar15, unsuccessfully.

Now finally I got installed the fairroot packages as suggested in the wiki. However, when I arrived at the point to install and compile the release on my pc (o.s. Fedora19), the following error occurs:

****
cmake ../mar15/
-- NOT Found FAIRBASE
CMake Warning at CMakeLists.txt:60 (find_package):
  By not providing "FindFairRoot.cmake" in CMAKE_MODULE_PATH this project has
  asked CMake to find a package configuration file provided by "FairRoot",
  but CMake did not find one.

  Could not find a package configuration file provided by "FairRoot" with any
  of the following names:

    FairRootConfig.cmake
    fairroot-config.cmake

  Add the installation prefix of "FairRoot" to CMAKE_PREFIX_PATH or set
  "FairRoot_DIR" to a directory containing one of the above files. If
  "FairRoot" provides a separate development package or SDK, be sure it has
  been installed.

****
It is the third time this week that I try to uninstall and install again those packages.

Could you please say what am I missing here? I am following the instruction at
https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRootInstallGit

It does not work out for me.

Best regards, Elisabetta
