Hello Stefano,

Thanks for your answer. However, I cannot edit the file you mention.
After typing the command you propose, I get the following:

```
-bash-4.1$ svn propedit svn:externals .  
svn: None of the environment variables SVN_EDITOR, VISUAL or EDITOR are set, and no  
'editor-cmd' run-time configuration option was found
```

How can I continue now?

Greetings,
Mamen.

P.S.: Donghee pointed out that I should install the version 11867, but I guess I should proceed in the same way...
