I am not 100% sure...

Every time I run svn update -r 11867 I get different packages updated...

However "parbaes" and "genfit" (and from the last one also some subdirectories) show always the error message:

```
svn: warning: Error handling externals definition for 'parbase':
```

```
svn: warning: OPTIONS of 'https://subversion.gsi.de/fairroot/fairbase/release/parbase': could not connect to server (https://subversion.gsi.de)
```

```
(.../...)
```

```
svn: warning: Error handling externals definition for 'genfit':
```

```
svn: warning: Repository moved permanently to 'https://svn.code.sf.net/p/genfit/code/core'; please relocate
```

```
svn: warning: Error handling externals definition for 'GenfitTools/trackrep/LSLtrackRep':
```

```
svn: warning: Repository moved permanently to 'https://svn.code.sf.net/p/genfit/code/LSLtrackRep'; please relocate
```

```
svn: warning: Error handling externals definition for 'GenfitTools/trackrep/GeaneTrackRep2':
```

```
svn: warning: Repository moved permanently to 'https://svn.code.sf.net/p/genfit/code/GeaneTrackRep2'; please relocate
```

```
svn: warning: Error handling externals definition for 'GenfitTools/trackrep/RKTrackRep':
```

```
svn: warning: Repository moved permanently to 'https://svn.code.sf.net/p/genfit/code/RKTrackRep'; please relocate
```

```
At revision 11867.
```

I've contacted our cluster-administration to investigate if it consist really of a network-connection problem. I still don't have an answer...

I'll sent an update when I know something new...

Thanks for your help.
