You should to the propedit command in the trunk, and modify the genfit line using now:

<https://svn.code.sf.net/p/genfit/code/core>

Moreover, in GenfitTools/trackrep you have to do again the propedit command and modify all the lines with:

<https://svn.code.sf.net/p/genfit/code/LSLtrackRep>

Since the genfit repository has changed in the meantime. And then the svn update -r 11867 from pandaroot folder.

About the problems with the base packages, in theory they should work, the link should be the same.

Are you sure you want to use code 4 years old?
