Hi! Again!

I added the line you propose doing `svn propedit svn:externals` in `GenfitTools/trackrep/` inside my `pandaroot` directory.

It looks now like this:

```
LSLtrackRep  -r216 https://svn.code.sf.net/p/genfit/code/LSLtrackRep
GeaneTrackRep2 -r 400 https://svn.code.sf.net/p/genfit/code/trunk/GeaneTrackRep2
RKTrackRep   -r313 https://svn.code.sf.net/p/genfit/code/LSLtrackRep
```

And it seems we went a step forward.

Now the command `cmake` complains about the following:

CMake Error at `GenfitTools/trackrep/CMakeLists.txt:57 (add_library)`:

Cannot find source file:

`RKTrackRep/RKTrackRep.cxx`

Tried extensions `.c .C .c++ .cc .cpp .cxx .m .M .mm .h .hh .h++ .hm .hpp .hxx .in .txx`

-- Build files have been written to: `/data/work/kpha4/moraespi/PandaRoot/build_v11867-02`
