Subject: [FIXED] PandaRoot cmake error (genfit missing) with Fairsoft jul15p1
Posted by Klaus Götzen on Tue, 17 Nov 2015 07:24:38 GMT

Hi,

I just tried to build PandaRoot against fairsoft jul15p1 and fairroot v15.07 and got the following error during cmake

CMake Error at CMakeLists.txt:264 (add_subdirectory):
  add_subdirectory given source "genfit" which is not an existing directory.

Somebody know what the problem is?

Best,
Klaus
