Subject: refining the EMC geometry ... help needed ....
Posted by Karoly Makonyi on Wed, 09 Dec 2015 14:02:06 GMT

Hello everyone,

I am not the person who will completely solve the 'dead material problem' of the EMC implemetation in PandaROOT, but I would like to implement little things in order to make a more proper dose/fluence calculation ...
Can one give me a short intro ho to do it? Or some example ... or some help ... ?

Thanks inadvance,
Karoly
