Ah! Thanks! Now we are getting closer...
I had set UCESB_PATH but UCESB_DIR was required *facepalm*

After fixing this, I still get the following config output:

```
-- Looking for ucesb...
- UCESB_DIR = /u/rplag/ucesb/unpacker
- ucesb_INCLUDE_DIR = /u/rplag/ucesb/unpacker/hbook
- ucesb_LIBRARY_SHARED = ext_data_clnt
- ucesb_LIBRARY_STATIC = ext_data_clnt.o
- ucesb_LIBRARY_DIR = ucesb_LIBRARY_DIR-NOTFOUND
-- Looking for ucesb... - Not found
```

I have now set:

```
echo $UCESB_DIR
/u/rplag/ucesb/unpacker
```

I'm wondering whether my ucesb directory structure is fine: My 'upexps' is on the same level as 'unpacker'. I have compiled and working: unpacker/empty and upexps/s438b. What exactly is the config script looking for?

```
rplag@lxc0858:~/ucesb$ ls
unpacker  unpackexps  upexps
```

Cheers,
Ralf
