Hi,

I can certainly write some documentation covering the following:

- Installation of ucesb & experiment specific unpacker
- Environment configuration for R3BROOT installation

I also should update the documentation here:

https://github.com/R3BRootGroup/R3BRoot/blob/dev/r3bsource/README_ucesb.md

Is that what you meant?

Right now I am quite busy with a report on our finished project, so let me know how urgent this is.
