Dear all,

I have created a new PandaRoot version, namely jan16, with trunk revision 28823.
This release works with mar15 for FairSoft and v-15.11 for FairRoot.

In order to download it:

```
svn co https://subversion.gsi.de/fairroot/pandaroot/release/jan16
```

You can find the release notes, with the major changes compared to mar15, at the following wiki page:

<https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRootJan16>

The suggested versions of the code are changed, now jan16 for analysis and trunk 28823 for development, as written here:

[https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRoot#Suggested
_version_of_the_code](https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRoot#Suggested_version_of_the_code)

I will create a Virtual Machine with jan16 under request.
