Hi All,

here are some (strong) recommendations where to store your source and header files related to the data analysis in R3BRoot:

R3BRoot
  r3bsource
    {classes that read mapped data from UCESB, aka R3B[Detector]Reader }
  r3bdata
    [detector]data
      {all classes that hold data, aka R3B[Detector][Level]Data }
  r3bdb
    [detector]db
      {all classes that hold calibration parameters,
       aka R3B[Detector][Level]Par }
  [detector]
    {classes that analyse data, aka convert from one level to another}
    unpack - obsolete, don't use this folder

Note that r3bdb is under discussion.
