Hi Christiaan,

fMeasCurrent is meant for ALADIN only. Field maps are measured with current 500, 1100, 1300, --, 2500 A. Depending on the fMeasCurrent you set in the macro the resulting field value will be interpolated.

For GLAD we have currently only fScale, which controls the magnitude of field.

Whether dependence between current and field is linear - this I can not answer.

Best regards,
Dima
