Hi, I have the following problem regarding the installation of external packages. It would be great to receive any kind of help and suggestions.

*** Package gtest is OK ***

*** Package gsl is OK ***

*** Compiling Boost

The patch boost_glibc.patch is already applied.

Building Boost.Build engine with toolset gcc...

Failed to build Boost.Build build engine

Consult 'bootstrap.log' for more details

scripts/install_boost.sh: line 67: ./b2: No such file or directory

**** Checking libraries in /home/debdeep/Desktop/Panda/fairsoft_mar15/buildFairSoft/lib ****

*** ERROR: Boost could not be created.

*** End installation of external packages with Errors***

Thanks and regards...

Debdeep
