Hello everyone,

I'm trying to compile FAIRSOFT master in OSX 10.11.4 (15E65) with XCode 7.3 (7D175).
After some problems, I tried a fresh installation with
compiler=Clang
debug=no
optimize=no
geant4_download_install_data_automatic=yes
geant4_install_data_from_dir=no
build_root6=yes
build_python=no
install_sim=yes

The installation stops systematically since last Friday:

```
*** Downloading pythia6 sources ***
% Total    % Received % Xferd  Average Speed   Time    Time     Time  Current
           Dload  Upload  Total   Spent    Left     Speed
  0   0   0   0   0   0   0   0  --:--:--  0:01:14 --:--:--    0curl: (7) Failed to connect to
root.cern.ch port 21: Operation timed out
*** Unpacking pythia6.tar.gz .....
--E-- Cannot unpack package pythia6
```

Do you have any hint about this problem?

Best regards and thank you for the support

Héctor
