Hello everyone,

I'm trying to compile FAIRSOFT master in OSX 10.11.4 (15E65) with XCode 7.3 (7D175).

After some problems, I tried a fresh installation with

compiler=Clang

debug=no

optimize=no

geant4_download_install_data_automatic=yes

geant4_install_data_from_dir=no

build_root6=yes

build_python=no

install_sim=yes

The installation stops systematically since last Friday:

*** Downloading pythia6 sources ***

% Total	% Received	% Xferd	Average	Speed	Time	Time	Time	Current
			Dload	Upload	Total	Spent	Left	Speed
0	0	0	0	0	0	0	0	--:--:-- 0:01:14 --:--:-- 0

curl: (7) Failed to connect to root.cern.ch port 21: Operation timed out

*** Unpacking pythia6.tar.gz

--E-- Cannot unpack package pythia6

Do you have any hint about this problem?

Best regards and thank you for the support

Héctor
