Subject: Problems in a fresh installation - pythia6
Posted by Hector Alvarez Pol on Tue, 12 Apr 2016 11:46:16 GMT

Hello everyone,

I'm trying to compile FAIRSOFT master in OSX 10.11.4 (15E65) with XCode 7.3 (7D175).
After some problems, I tried a fresh installation with
compiler=Clang
debug=no
optimize=no
geant4_download_install_data_automatic=yes
geant4_install_data_from_dir=no
build_root6=yes
build_python=no
install_sim=yes

The installation stops systematically since last Friday:

*** Downloading pythia6 sources ***
  % Total   % Received % Xferd Average Speed Time   Time   Time Current
                             Dload Upload Total Spent   Left Speed
  0   0   0   0   0   0   0   0 --:--:-- 0:01:14 --:--:--   0curl: (7) Failed to connect to
root.cern.ch port 21: Operation timed out
*** Unpacking pythia6.tar.gz ....
--E-- Cannot unpack package pythia6

Do you have any hint about this problem?

Best regards and thank you for the support

Héctor
