Elisabetta Prencipe (2) wrote on Tue, 12 April 2016 14:05Dear all,

2) Installing FairRoot...troubles:

```
>>>>> cmake
```

```
-DCMAKE_INSTALL_PREFIX=/home/prencipe/panda/fairsoft_mar15/buildFairRoot
/home/prencipe/panda/fairsoft_mar15/FairRoot
```

```
-- fairsoft-config found
```

```
-- C compiler used for FairSoft installation: /usr/bin/gcc
```

```
-- C compiler used now: /usr/bin/gcc
```

```
-- CXX compiler used for FairSoft installation: /usr/bin/g++
```

```
-- CXX compiler used now: /usr/bin/c++
```

```
-- The compiler during the compilation of FairSoft is different from the current one.
```

```
CMake Error at cmake/modules/CheckCompiler.cmake:64 (Message):
```

```
This is seen as an error. If you know that the setting is correct you can
```

```
silence the error by using the CMake flag -DUSE_DIFFERENT_COMPILER=TRUE
```

```
Call Stack (most recent call first):
```

```
  CMakeLists.txt:55 (Check_Compiler)
```

```
.
```

First of all, it should be:

```
cmake -DCMAKE_INSTALL_PREFIX=/home/prencipe/panda/fairsoft_mar15/buildFairRoot
/home/prencipe/panda/fairsoft_mar15/buildFairRoot ../
```

CMAKE\_INSTALL\_PREFIX is where you are going to export the libraries, not where the code is staying. If you check the wiki page:

```
pandauser@panda-VirtualBox:~/fairsoft_mar15/FairRoot/build$ cmake
```

```
-DCMAKE_INSTALL_PREFIX=/home/pandauser/fairsoft_mar15/buildFairRoot
```

```
/home/pandauser/fairsoft_mar15/FairRoot
```

Second, the error is known, and in wiki it is described how to fix it:

```
pandauser@panda-VirtualBox:~/fairsoft_mar15/FairRoot/build$ cmake
```

```
-DUSE_DIFFERENT_COMPILER=TRUE
```

```
-DCMAKE_INSTALL_PREFIX=/home/pandauser/fairsoft_mar15/buildFairRoot
```

```
/home/pandauser/fairsoft_mar15/FairRoot
```
