Hello Stefano,

following your instruction n. 1 (which is not what I read in the wiki) I get again:

```
-- fairsoft-config found
-- C compiler used for FairSoft installation: /usr/bin/gcc
-- C compiler used now: /usr/bin/gcc
-- CXX compiler used for FairSoft installation: /usr/bin/g++
-- CXX compiler used now: /usr/bin/c++
-- The compiler during the compilation of FairSoft is different from the current one.
CMake Error at cmake/modules/CheckCompiler.cmake:64 (Message):
  This is seen as an error. If you know that the setting is correct you can
  silence the error by using the CMake flag -DUSE_DIFFERENT_COMPILER=TRUE
Call Stack (most recent call first):
  CMakeLists.txt:55 (Check_Compiler)
```

```
-- Configuring incomplete, errors occurred!
```

```
See also " /home/prencipe/panda/fairsoft_mar15/FairRoot/build/CMakeFiles/CMakeOutput t.log
".
```

any idea? thanks,
cheers, Elisabetta
