Hello Stefano,

following your instruction n. 1 (which is not what I read in the wiki) I get again:

```
-- fairsoft-config found
-- C compiler used for FairSoft installation: /usr/bin/gcc
-- C compiler used now: /usr/bin/gcc
-- CXX compiler used for FairSoft installation: /usr/bin/g++
-- CXX compiler used now: /usr/bin/c++
-- The compiler during the compilation of FairSoft is different from the current one.
```

CMake Error at cmake/modules/CheckCompiler.cmake:64 (Message):

This is seen as an error. If you know that the setting is correct you can  
silence the error by using the CMake flag -DUSE\_DIFFERENT\_COMPILER=TRUE

Call Stack (most recent call first):

```
CMakeLists.txt:55 (Check_Compiler)
```

-- Configuring incomplete, errors occurred!

See also " /home/prencipe/panda/fairsoft\_mar15/FairRoot/build/CMakeFiles/CMakeOutput.log ".

any idea? thanks,  
cheers, Elisabetta
