Hi:

You did not notice the second line in the box.

About the problem -DUSE\_DIFFERENT\_COMPILER, the solution is described in the second point.

```
cmake -DUSE_DIFFERENT_COMPILER=TRUE  
-DCMAKE_INSTALL_PREFIX=/home/pandauser/fairsoft_mar15/buildFairRoot  
/home/pandauser/fairsoft_mar15/FairRoot
```

- Call cmake to create your make files or project files for Xcode, Eclipse, KDeveloper, etc. You need to specify the location and the source code directory:

```
pandauser@panda-VirtualBox:~/fairsoft_mar15/FairRoot/build$ cmake -DCMAKE_INSTALL_PREFIX=/  
/home/pandauser/fairsoft_mar15/FairRoot
```
