Subject: Problems with macros

Hi everyone,

I updated my machine to

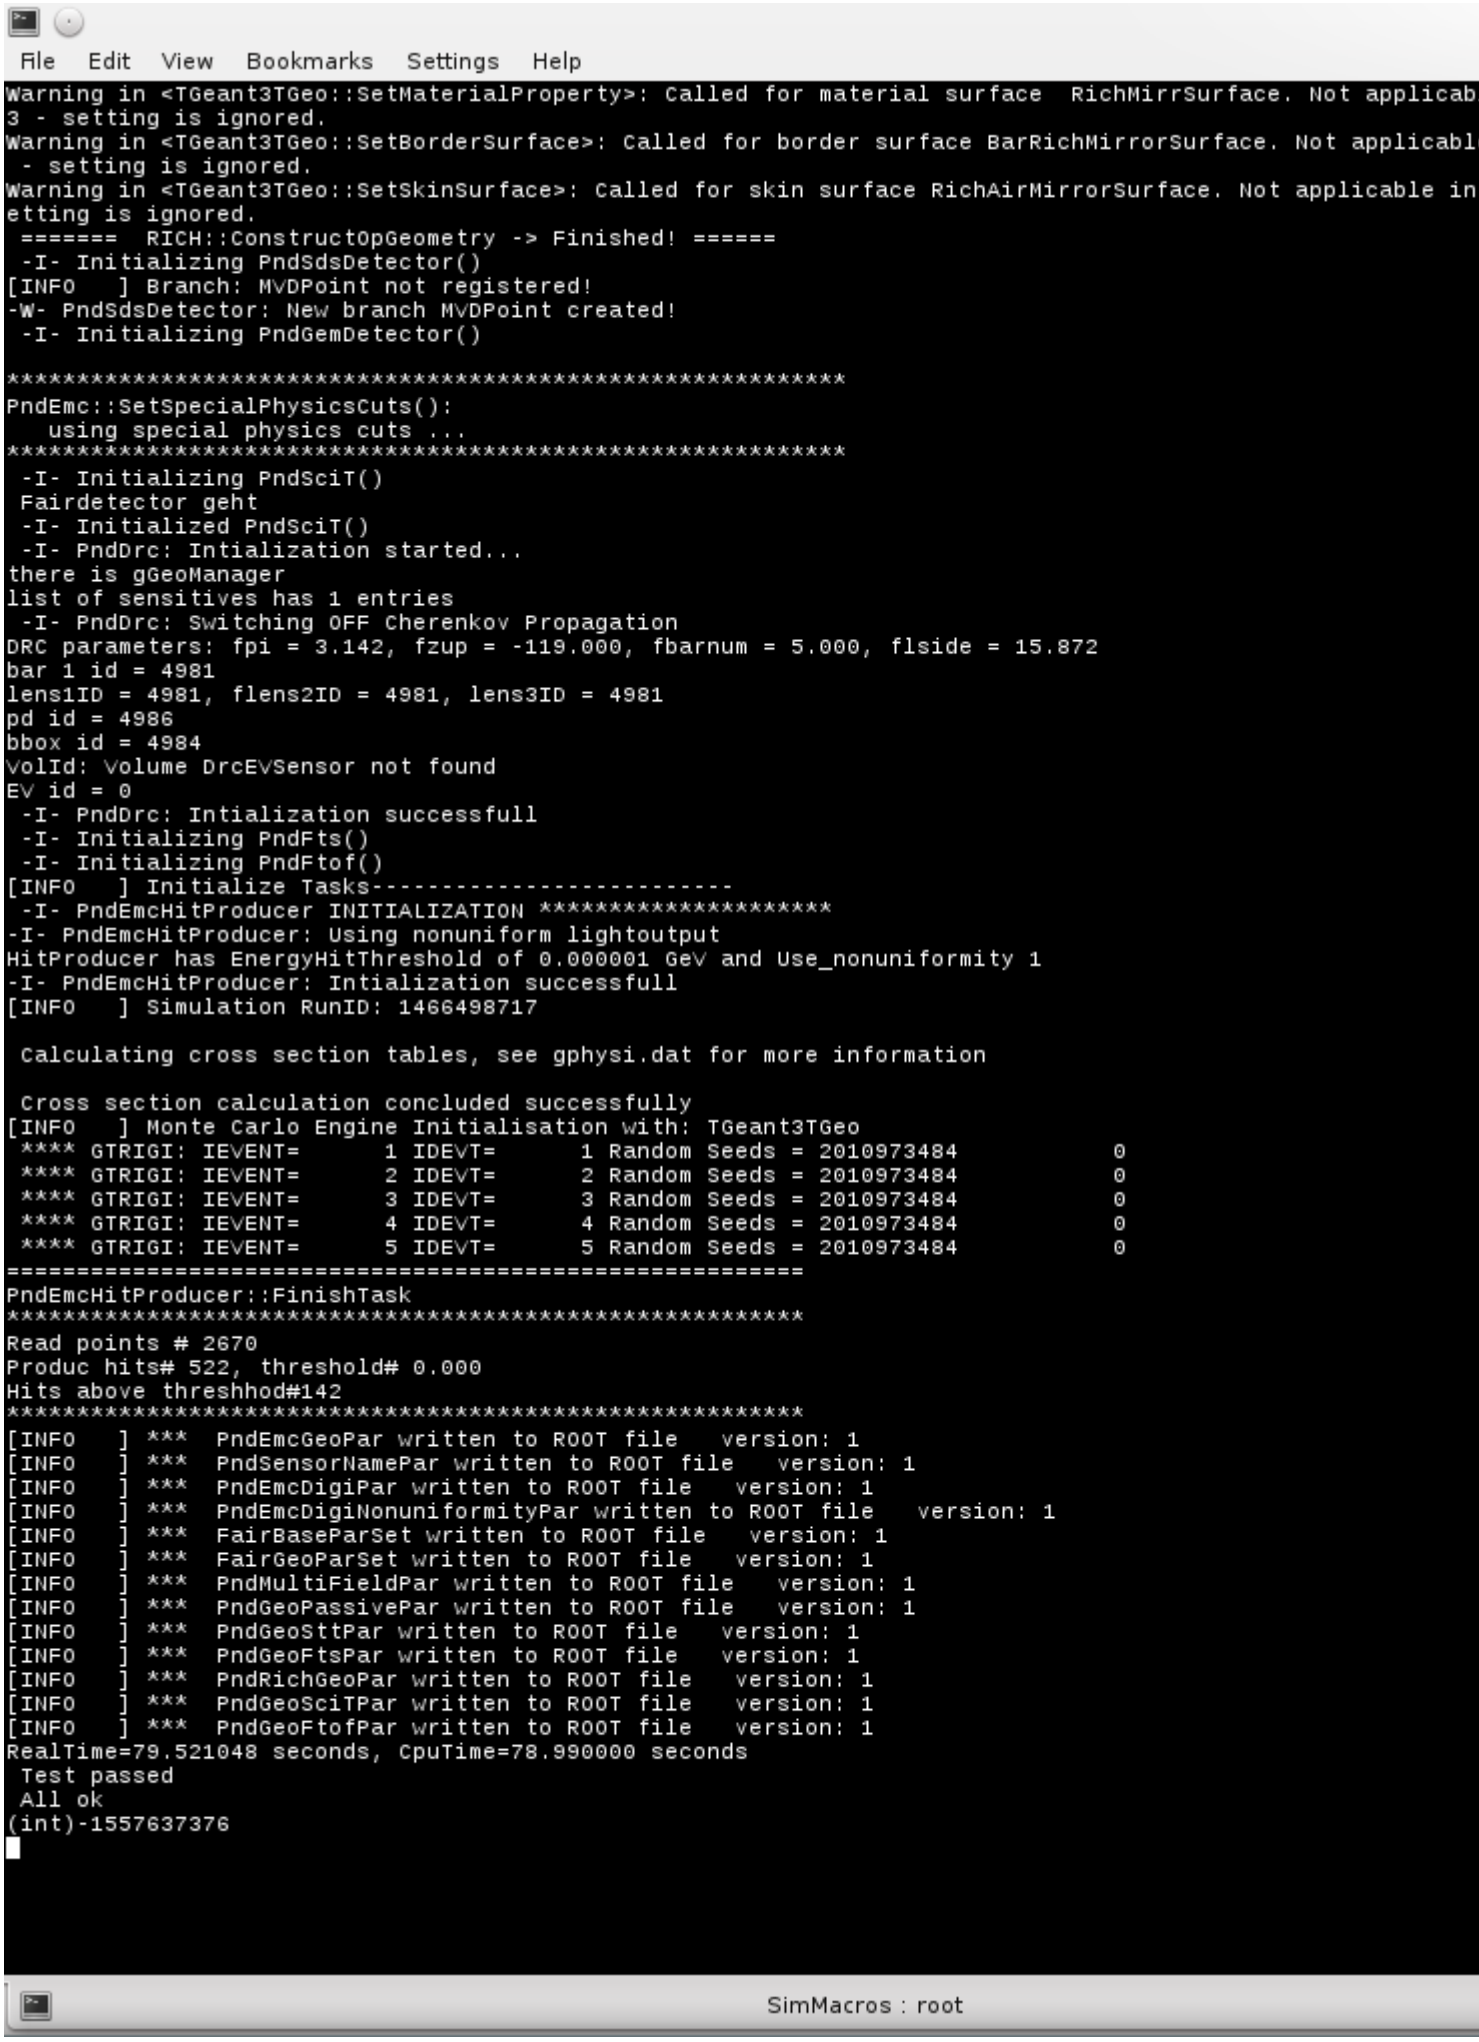

FairSoft: nov15p5
FairRoot: v15-11c
PandaRoot: trunk rev. 29165

I tried to run the simulation with the standard macro macros/run/sim_complete.C. The macro produces a "proper" sim_complete.root file, but the macro doesn't end (I attached a screen shot). I tried several options like run the macro with root -q or adding an exit(0) to the end of the macro, but no option is working. I have to kill the task at the end.
I tried some other macros, but the problem is the same.

Best,
Jenny
