Subject: Re: Problem with TGeant4?
Posted by C. A. Douma on Wed, 29 Jun 2016 09:27:47 GMT

Dear Mr. Kresan,

Your advice reminded me of an earlier discussion we had about how to adapt the Geant4 Physics list to
cut of the delta electrons for heavy ions. When making those and your new modifications, all problems
were solved. The Geant4 detection effciency for NeuLAND is now about 99% (not resolving efficiency, that one
is about 95%).

I included the physics list that I used for this. It is indeed quite different from the current one!

Christiaan.
