Hello,

I am installing CBM root version JUN16. I am installed FairSoft and FairRoot. Versions of these two are as per release version i.e. FairRoot version: v-15.11e, FairSoft version: nov15p6 (ROOT5). But when I am trying to install cbm root then during building it is giving me following error.

```
g++: error: unrecognized command line option '--no-as-needed'  
g++: error: unrecognized command line option '--no-as-needed'  
make[2]: *** [bin/runStsSplitter] Error 1  
make[1]: make[2]: *** [bin/runStsMerger] Error 1  
*** [tutorials/cbmMQTest/CMakeFiles/runStsSplitter.dir/all] Error 2  
make[1]: *** Waiting for unfinished jobs....  
make[1]: *** [tutorials/cbmMQTest/CMakeFiles/runStsMerger.dir/all] Error 2
```

and

```
g++: error: unrecognized command line option '--no-as-needed'  
make[2]: *** [bin/runCbmMQFileSink] Error 1  
make[1]: *** [tutorials/cbmMQTest/CMakeFiles/runCbmMQFileSink.dir/all] Error 2
```

So please Can anyone help me?
