Hi,

this is okay. Please change the following lines in scripts/install\_millepede.sh

Quote:

```
if [ "$platform" = "macosx" ];  
then  
  fortran_filepath=$(gfortran -print-file-name=libgfortran.dylib)  
  fortran_libdir=$(dirname $fortran_filepath)  
  mysed "-lgfortran " "-L${fortran_libdir} -lgfortran " Makefile has_slash  
fi
```

to

Quote:

```
# if [ "$platform" = "macosx" ];  
# then  
  fortran_filepath=$(gfortran -print-file-name=libgfortran.so)  
  fortran_libdir=$(dirname $fortran_filepath)  
  mysed "-lgfortran " "-L${fortran_libdir} -lgfortran " Makefile has_slash  
# fi
```

and recompile. I hope that this change will solve your problem.

Ciao

Florian
