Hi Stefano.

the point is that I do not manage to install working external package myself in kronos. But I cannot do half bkg production with oct14, and half with the newest releases, for problems of consistency and code compatibility. There should be some patches, somehow, which I ignore....

Thanks for your quick reply, anyway.

Florian, do you have some suggestions to install apr13 ext. packages and run the release oct14? (better to communicate through the forum: other people can have the same troubles...)

Thanks in advance for your suggestion.

My best, Elisabetta
