Hello,

was a solution found to this problem? I want to run simulations on the Kronos cluster and currently trying to install pandaroot on a lxbk machine.

I also get the same error when trying to check out genfit2.

```
svn: warning: W200000: Error handling externals definition for 'trunk/genfit2/core':

Checked out revision 29580.
```

However, I do not get this error when checking out pandaroot on my personal computer.

How do I proceed?

Walter
