Hi,

I think the problem is that the kronos cluster is behind a firewall, such that there is no svn acces to the outside. Please change the file ~/.subversion/servers to define a proxy for svn. Add simply the following lines.

```
http-proxy-host = proxy.gsi.de  
http-proxy-port = 3128  
http-proxy-exceptions = *.gsi.de
```

Ciao

Florian
