You should not use master, you should use the suggested versions:

https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRoot#Suggested \_version\_of\_the\_code

Currently (but they could change in the next days):

Quote:For ANALYSIS

FairSoft mar15p6
FairRoot v-15.11c
PandaRoot release jan16
(updated on 08/06/2016)
For CODE DEVELOPMENT NEW

FairSoft may16p1 FairRoot v-16.06 PandaRoot trunk 29475 (updated on 07/09/2016)

These are tested, for sure master is not meant for users and it is not maintained by us. Please use the wiki instructions.
