Dear Developers,

There is a new commit dealing mostly with the order of variable initialization. (2/3 of this part is done).

I want to steer the attention to the following files:

PndSttGeometryMap.cxx: l.227

PndEmc.cxx: l.468

PndEmcStructure.cxx: l.561

---> Here are logical operations not written explicitly with braces. Please revisit this part thoroughly!

Cheers!

Ralf
