Dear PandaRooters,

we will replace the bugs, fixes part of the forum with a redmine system "pandamine" for bug tracking and as a replacement for the work packages wiki.

You can find it here: <https://pandamine.gsi.de/projects/pandaroot>

To get access to pandamine you can use your GSI web login credentials.

So please use it from now on!

If you are not able to access pandamine contact me directly.

Cheers,

Tobias
