Subject: Re: CALIFA-SiTracker-GLAD geometry conflict Posted by Michael Heil on Mon, 13 Mar 2017 13:41:45 GMT View Forum Message <> Reply to Message

Hello Anna,

here is my view of how to solve this problem: We used to have the target Position at x=0, y=0 and z=0 per Definition. The distance from the target position to the entrance flange of GLAD is 1062 mm. And Califa has also a nominal position relative to the target. If both are at this position there should be now overlap anymore.
