Hello Tobias,

thank you for your response.

I created a modified script `jobsim_complete.sh` for submitting jobs to kronos where four macros are called (`prod_sim`, `prod_dig`, `prod_rec` and `prod_pid`).

I also modified the `digi`, `reco` and `pid` macro slightly as they would crash otherwise...

```
//fRun->Run(0, nEvents); //removed this line  
fRun->Run(0);
```

Cheers,

Walter
