Hello Tobias,

thank you for your response.
I created a modified script jobsim_complete.sh for submitting jobs to kronos where four macros
are called (prod_sim, prod_dig, prod_rec and prod_pid).
I also modified the digi, reco and pid macro slightly as they would crash otherwise...

```
//fRun->Run(0, nEvents); //removed this line
fRun->Run(0);
```

Cheers,

Walter
