Subject: How to write Macros with newest trunk code Posted by Stefan Pflueger on Thu, 14 Sep 2017 16:11:39 GMT View Forum Message <> Reply to Message

Hello,

I updated to the newest FairRoot (17.03) and pandaroot code (trunk), and cannot get the Imd macros to work (or also the macros in macro/run). Our Imd macros seem not to be compatible with the current development trunk as the all create double free corruption errors. Is there any macros that should work and have been tested with this development setup? Then I have some guideline on how to steer the whole simulation and reconstruction chain and adapt our macros to the new FairRoot. Thanks in advance

Stefan
