Hallo Stefan,

Just to be clear on your setup: Did you install
FairSoft may16p1
FairRoot v-17.03
PandaRoot trunk
ROOT version 6
?

The macros in macro/run are phasing out. Please go on in macro/master for the default configuration.
I know there is a double free message upon quitting root 6, which should not harm the calculations.
Other than that, some error message log would be helpful.

Cheers!
  Ralf
